To whom it may concern:

UISM Inc. has signed on to partner with Duke Energy to promote the Duke Energy Savings Program. Rob Jung, who is the Trade Ally Rep for the Duke program, is responsible for the growth and understanding of the incentive program to all trade ally contacts in the area. Rob Jung's success is based on the partnership formed with these trade groups, one such being UISM, Inc. Together they can promote the Duke Energy Savings Program as a means to provide incentive money to electric end users for the installation of energy reduction products. The overall Duke program can only be successful if the trade groups promote the program.

Wisconsin Energy Conservation Corp. (WECC) is an energy service company contracted by Duke Energy to manage, administer and market the energy efficiency incentive programs.

A handwritten signature in blue ink that reads "R M Jung". The signature is fluid and cursive, with the first letters of each name being capitalized and prominent.
